Your Name: _____Nick Morris_____

These peer evaluations are confidential to the extent allowed and will not be shared with any team members.

Directions:

- Put the name of all team members at the top of each row in alphabetic order by last name. Be sure to include yourself!
- Rate yourself and each of your team members using the statements on the left of the table by highlight the corresponding number.

4 = Strongly Agree, 3 = Agree, 2 = Disagree, 1 = Strongly Disagree

Team member Names ------> (Include yourself)	Hector Curi	John Politz	Nick Morris	Taylor Bishop	Tyler George	
Helped groups achieve a shared vision for addressing the project challenge.	4	4	4	4	4	4 3 2 1
Offered constructive advice, feedback, or questions to clarify the team's direction.	4	4	4	4	4	4 3 2 1
Encouraged the group to discuss due dates and performance expectations.	3	4	4	4	4	4 3 2 1
Provided constructive feedback to team members if they failed to meet performance expectations.	3	4	3	4	3	4 3 2 1
Helped group members find ways their strengths could serve the project team.	3	3	3	3	3	4 3 2 1
Completed assigned tasks on time.	3	4	4	4	4	4 3 2 1
Regularly attended meetings.	3*	4	4	4	3	4 3 2 1
Put the group's interests ahead of personal ones.	3	3	3	3	3	4 3 2 1
Has done a fair and reasonable share of work in comparison to other team members.	2	4	4	4	3	4 3 2 1
Participated in writing and revising of the technical design document.	4	3	4	4	3	4 3 2 1

Open response questions:

- What technical challenges have you and your team faced so far in the project?

  o Linking between the server side and the front end has been our biggest challenge during both our Taco Truck and Upresent projects. On the GUI side, the JavaScript has been the most challenging, but thankfully John has done a great job with it, and Taylor has helped with it also.

- What group dynamic challenges has your team faced? Is it difficult to get your team to meet? Is it difficult communicating with a particular team member, etc?
  o Most times our team meets at least twice a week. Most of our team is able to meet, but due to our busy schedule, it's difficult to get all of us together for a meeting; most times, we have between 2 and 4 people meeting. We do a good bit of coding on our own. The only team member that has been problematic has been Hector; most team meetings he tends to argue with other team members about different aspects of the website and doesn't seem to do much code then. He did a great job on the paper prototypes for both Taco Truck and UPresent, but he didn't make many contributions with code on Taco Truck. It has been better for UPresent though. Tyler wasn't able to contribute much last week because he was sick, but hopefully we'll be back up to full strength soon.
